### EXAMINER'S AMENDMENT

Authorization for this examiner's amendment was given in a telephone interview with Brad Y. Chin on August 21, 2008.

The application has been amended as follows:

Claim 25 line 1, delete "readable storage medium" After "computer".

Claim 25, line 1, insert -- program product embodied on a computer readable medium, the computer program product being configured to control a processor to perform the method comprising: -- after "computer"

#### *Allowable Subject Matter*

1. **Claims 1-2, 7-18, 20-25** allowed.
2. The following is an examiner's statement of reasons for allowance:
3. **Claims 1, 8, 17, 24 and 25** are allowed because the closest prior art, Engstrom et al. (US Patent 6,639,934), fails to anticipate or render obvious the concept providing data-rate-sensitive power control of a transmitter by estimating a change in a signal-to-interference with respect to a first and second data rate, using the estimated change to adjust the target signal-to-interference to provide a reference signal-to interference value for closed-loop power control to increase the accuracy of the power control of a telecommunication system, in combination with all other limitations in the claim (s) as defined by applicant.

Engstrom et al. discloses a transmission power control method where the target SIR value is controlled by an achieved SIR estimate, but does not adjust the target signal-to-interference using the estimate change of the signal-to-interference with respect to a first and second data rate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
